TECHNICAL EVIDENCE

FillDB Performance Analysis

This analysis covers a FillDB capture from 11-16-2025 02:56 to 11-17-2025 15:57. The analyzer processed 4,237,218 lines. FillDB writes no Excel. The source CSV is saved beside this Mini Report.

FillDB Health Score

4,237,218 lines processed · capture 1 day, 13 hours

100 / 100

HEALTHY

3 of 4 guide checks assessed. All 3 met the standard.

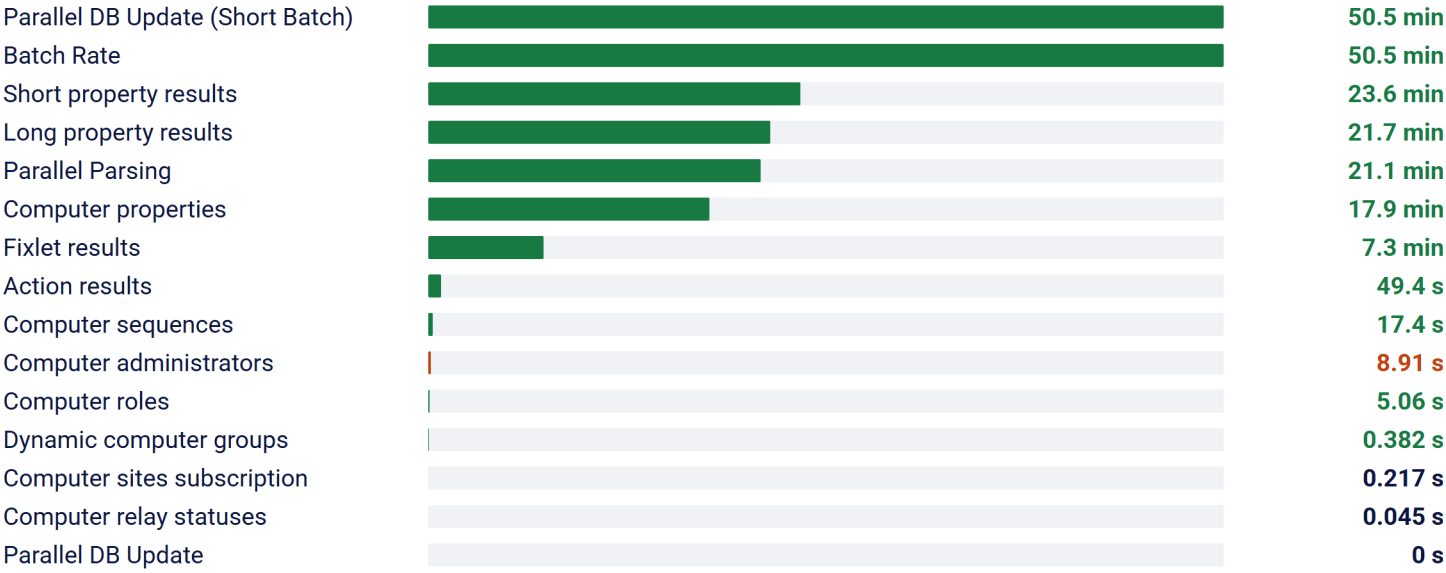

OBJECT HEALTH · 15 OBJECTS · 12 ASSESSED

• Healthy · **11** • Critical · **1** Not Assessed · **3**

WORKLOAD BY OBJECT · PROCESSING TIME

Length shows processing time. Color shows the analyzer rating.

Score ranges: 90 to 100 Healthy, 70 to 89 Needs Attention, 0 to 69 Critical. Good or Great earns 100 and Poor earns 0 on the four guide checks.

How This Score Is Calculated

The FillDB Health Score is based on the share of the guide's FillDB checks that meet the standard:

- Great or Good: 100 points
- Poor: 0 points

The score covers the four checks named in PRF-BIG-30 FillDB Health Check (BigFix Non-Functional Requirements: A Checklist Approach, version 11.x.4, page 25): Parallel DB Update (Short Batch), Parallel DB Update, Batch Rate and Parallel Parsing. The guide says each should have a health check of Good or Great.

Formula: (Great + Good) / assessed checks x 100

This score covers the FillDB capture only.

Other objects and checks without a recognized Health Check result are shown for context but are not included in the score.

Score ranges: 90 to 100 is Healthy, 70 to 89 is Needs Attention and 0 to 69 is Critical.

The analyzer rates 10 objects Great, 1 Good and 1 Poor. 3 objects had too little data to rate. Parallel DB Update (Short Batch) takes the most time at 50.5 minutes. The score covers 3 of the 4 checks named in the NFR guide. The other 1 had too little data. The Workload by Object chart in the Infographic shows the time for every object.

FillDB Objects

Health Check is the analyzer's own rating, shown as the analyzer writes it. Rows marked Not enough data are left out of the score.

FillDB Object	Count	Time (ms)	Rate/s	Health Check
Fixlet Results	1,021,932	439,062	2,328	**093%: Good**
Action Results	88,953	49,436	1,799	**360%: Great**
Short Property Results	15,491,643	1,417,112	10,932	**2186%: Great**
Long Property Results	1,822,795	1,304,706	1,397	**140%: Great**
Computer Administrators	601	8,906	67	**004%: Poor**
Computer Roles	19,879	5,062	3,927	**393%: Great**
Computer Sequences	1,496,322	17,405	85,971	**8597%: Great**
Computer Properties	1,496,271	1,071,013	1,397	**140%: Great**
Computer Sites Subscription	1,243	217	5,728	----: Not enough data.
Computer Relay Statuses	77	45	1,711	----: Not enough data.
Dynamic Computer Groups	1,982	382	5,188	**519%: Great**
Parallel DB Update (Short Batch)	1,496,466	3,031,912	494	**988%: Great**
Parallel DB Update	0	0	0	----: Not enough data.
Batch Rate	1,496,466	3,031,912	494	**988%: Great**
Parallel Parsing	1,496,466	1,267,825	1,180	**236%: Great**

Capture Summary

Duration (s) and Throughput (lines/s) are the analyzer's own run time and speed. They are not FillDB times.

Statistic	Value
